**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23-25,31-34,38,39,41,42 are rejected under 35 U.S.C. 102(b) as being anticipated by Haug. This patent discloses a fibrous suspension being treated by relatively moving rollers and a cylinder.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 26-30,35-37,40,43-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haug. The limitations of these claims would have been obvious modifications by one skilled in the art once the basic process was known. For example, the relative speeds of the apparatus would depend on several factors such as material being treated and desired end results. Also, the use of two inlets would have been obvious if it was desired to increase material feed.
